South Jakarta, Indonesia

Fresh graduate in Computer and Network Engineering with internship and project experience in web development, data analysis, dashboard creation, and information technology support. Experienced in developing web-based systems, managing databases, creating business intelligence dashboards, and supporting operational processes using Laravel, PHP, MySQL, Power BI, Looker Studio, JavaScript, and Python. Strong interest in System Engineer, Data Analysis, Data Visualization, Dashboard, Reporting with a focus on troubleshooting, system reliability, database management, and continuous improvement of technology environments.

EDUCATION

Applied Bachelor (D4) in Computer and Network Engineering
Politeknik Negeri Ujung Pandang, Graduated Aug 2025 | GPA: 3.81/4.00

Makassar, Indonesia
2021-2025

EXPERIENCE

PT Yanagi Histalaraya

Kendari, Indonesia

Data Analyst

Jan 2025 - Aug 2026

- Developed a web-based monitoring system to visualize sales, raw material, and revenue data in real time.
- Built a business monitoring website using the Laravel framework to improve data management efficiency and reporting processes.
- Implemented interactive data visualizations using Chart.js to simplify business performance analysis and support data-driven decision-making.
- Managed the system database and ensured the integrity and accuracy of operational data.
- Analyzed sales and revenue data to identify trends, evaluate business performance, and uncover opportunities for profit improvement.
- Collaborated with operational and management teams to develop system features based on business requirements.
- Performed system maintenance, troubleshooting, and continuous performance improvements to ensure application reliability.

Kalla Group

Makassar, Indonesia

Data Analyst Intern

Sep 2024 - Jan 2025

- Developed Power BI dashboards to visualize sales demand structure, revenue, and profit to support business analysis.
- Integrated dashboards into PT Hadji Kalla's internal website, enabling Kalla Toyota users to monitor real-time data.
- Processed business data and maintained dashboards based on operational and reporting needs.

SELECTED PROJECTS

Website Monitoring and Visualization of Marine Products Distribution (Final Thesis)

PHP, Laravel, Bootstrap, MySQL, Chart.js

- Developed a web-based monitoring system to efficiently track the distribution of marine products.
- Implemented interactive data visualization using Chart.js to provide insights into distribution patterns.
- Built real-time reporting features to improve operational monitoring and business decision-making.
- Designed and managed relational databases to ensure data accuracy, consistency, and secure storage.
- Improved operational efficiency by centralizing distribution, sales, and inventory data into a single integrated platform.

Demand Structure Dashboard Monitoring

Power BI, Data Visualization, Business Intelligence

- Designed and developed a Power BI-based demand structure dashboard to monitor sales, profit, and revenue performance.
- Enabled users to visualize business data through interactive charts and reports for real-time monitoring.
- Improved decision-making by providing clear, accurate, and accessible business insights through the company's internal system

Fingerprint Attendance System for Educational Staff of Ujung Pandang State Polytechnic Using IoT

IoT, Networking, System Design, Security

- Designed an IoT-based fingerprint attendance system for educational staff, covering network architecture, algorithms, system security, and hardware requirements.
- Conducted surveys with educational staff to analyze the existing attendance process and identify system improvement needs.
- Developed a more efficient and secure attendance solution to support digital transformation in administrative operations.

Android-based Cashier Application for UMKM Teh Tubruk Khas Solo

Android Studio, Kotlin, Firebase, Figma

- Designed the cashier application interface using Figma to provide an intuitive and modern user experience.
- Developed the front-end of the Android-based application using Android Studio with Kotlin programming language.
- Built a real-time database using Firebase to support transaction recording and efficient data synchronization.

CORE TECHNICAL SKILLS

- **Data Analytics & Visualization :** Power BI, Looker Studio, Chart.js, Microsoft Excel
- **Database Management:** MySQL, Oracle SQL, Microsoft SQL Server, Firebase
- **Operating Systems:** Linux
- **Web Development:** PHP, Laravel, HTML, CSS, Bootstrap, JavaScript
- **Programming Languages:** PHP, JavaScript, Python, Java, Kotlin, C
- **Tools & Platforms:** Visual Studio Code, Android Studio, Git, XAMPP, Microsoft Office
- **Other Skills :** Troubleshooting, System Analysis, Reporting, UI/UX Design (Figma)

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Human Resources Staff

Feb 2025 – Jul 2025

Himpunan Mahasiswa Teknik Informatika dan Komputer PNUP

- Supported HR activities, member administration, and organizational programs.
- Collaborated with team members to coordinate activities and maintain effective internal communication.

Merdeka Student Exchange Batch 4 (PMM)

Feb 2024 – Jun 2024

Campus Politeknik Negeri Malang – East Java

- Participated in a national student exchange program involving academic, cultural, and collaborative activities.
- Received the Best Journal Award among PMM Batch 4 participants from polytechnics across Indonesia.

Research & Development Coordinator

Sep 2023 – Dec 2024

Computer and Network Community (CNC), Politeknik Negeri Ujung Pandang

- Coordinated research and development activities and supported technology-focused organizational programs.
- Collaborated with members to develop ideas, projects, and initiatives related to technology and computing.

UKM Bahasa Politeknik Negeri Ujung Pandang

- Managed organizational documentation, correspondence, and administrative activities.
- Supported event preparation and coordination with members and other divisions.

Moderator

Jan 2023

National Seminar on Cyber Security Politeknik Negeri Ujung Pandang

- Moderated a national seminar and facilitated communication between speakers and participants.
- Developed public speaking, communication, and event coordination skills.

CERTIFICATIONS & TRAINING & PROGRAMS

Web Programming Certification – BNSP

Aug 2025

- Demonstrated competency in web programming and application development.
- Applied programming, database integration, and web development concepts.

Test of English Proficiency and Academic (TOEFL)

May 2025

- TOEFL Score: 557
- Demonstrated English proficiency in listening comprehension, structure and written expression, and reading comprehension

Merdeka Student Exchange Batch 4 (PMM)

July 2024

- Participated in a national student exchange program involving academic and cross-cultural learning.
- Developed collaboration, communication, adaptability, and interpersonal skills through diverse learning environments.

National Seminar on Socialization of Preparation for Digital Talent , Kominfo

Jan 2023

- Gained insights into digital talent development and industry-relevant technology skills.
- Learned about the importance of digital competencies in supporting Indonesia's digital transformation.

Expert Talk: Business Intelligence / Enterprise System (Carnaval IMWORK)

Oct 2023

- Gained insights into Business Intelligence and Enterprise Systems in modern organizations.
- Learned how data and enterprise technology support data-driven decision-making and business processes.

Expert Talk: Cyber Security (Carnaval IMWORK)

Oct 2023

- Gained knowledge of cybersecurity concepts, digital threats, and information security risks.
- Learned the importance of security awareness and preventive measures in protecting digital systems.

Challenges and Strategies in Digital Transformation in Indonesia (Carnaval IMWORK)

Oct 2023

- Gained insights into challenges and opportunities in implementing digital transformation.
- Learned strategies for leveraging technology and innovation to improve organizational processes.

Volunteer – Charity Event UKM Bahasa PNUP | Tobalu Orphanage

Apr 2023

- Participated as a volunteer in a charity event at Tobalu Orphanage, supporting social and community service activities.
- Contributed to event activities through teamwork, communication, and engagement with the children and community.
